

Get the Best Results With Our Improved Broiler Watering System.

We have your watering solution!

We have the perfect drinker for your birds. VAL-CO now manufactures a more complete line of drinkers. We have added options to allow you to select the drinker the best fits your needs. Each nipple drinker provides fresh, clean water and combined with our easier flushing intakes and white watering lines make this the coolest system around. Your birds will get cooler fresh water and more of it.

IMPROVED Broiler Watering System:

- **NEW** Locking Saddle – no locks are needed for any type bird. Allows for optional use of cups, as well.
- **WIDE VARIETY** of Nipple Drinkers – multiple choices... no wrong answers.
- **NEW** Folding Standpipe prevents breakage when raising water lines.
- **IMPROVED** Extra High Flow VR205 Regulator for more water flow.
- **NEW** Regulator Intake for even easier line flushing.

In an effort to provide our customers with the best quality nipple drinkers and regulator housings, VAL-CO looked to **GE** and their **Xenoy*** **engineering thermoplastic resin**. **GE's Xenoy* resin** is a durable polyester-based material that offers an excellent balance of mechanical strength and chemical resistance. VAL-CO's in-house testing has determined that these new drinker and housing designs, in conjunction with the Xenoy* resin, has strength, durability and reliability.

(*Xenoy is a trademark of General Electric Company.)

 - Nests
- Cage Equipment
- Brooders & Heaters
- Evaporative Cooling
- Fans & Other Ventilation
- Whole House Controllers™
 - Cremators

The NEW Locking Saddle

This is a brand new saddle which ensures the nipple stays locked in place until you're ready to remove it. No nipple locks needed for any type of bird. With this new locking saddle, nipples can be removed without the use of a nipple tool.

The NEW VAL-CO EZ-Flush Intake

Now flushing your water lines is even easier and cleaner. With 3/4" hose and openings, the VAL-CO Bigger Intake will flush any debris out of the pipe. Just twist the handle to REG, FLUSH or OFF. No additional installation required, just screw into the regulator. In the REG position, the water will be regulated normally with changes made with the knob underneath. In the FLUSH position, water bypasses the seal and flushes into the water lines. In the OFF position, all water flow stops. The EZ-Flush Intake works with all VAL-CO regulators – old & new.

The NEW Folding Standpipe

Raising your water lines without damaging your standpipes has never been easier with VAL-CO's new Folding Standpipe. It can be used with either the rigid or the flexible standpipes, and allows them to lay parallel to the water pipe. If you have a low roof height, you need our Folding Standpipe!

The IMPROVED Extra High Flow VR205

The water flow has been increased in the High Pressure Regulator so there is always enough water for the birds, even at 6:30 AM. Experience shows that this new system provides at least 20% more water in a 500 FT length of pipe than the birds will ever need at the peak feed and watering time.

Call your local VAL-CO representative or distributor for more information on these and other fine quality products.
